

# Motion for the Modern World

**DigitalMotion™**

Developing strategic partnerships to deliver channel tailored ergonomic products to value added resellers, OEMs, and distributors.

# Natural Warmth Modern Design.

## Power-Adjustable Desk Pioneers

Leading Edge Standing Desk and Ergonomic Solutions

Digital Motion is focused on delivering the most innovative products to the fast growing height adjustable workstation market. We only deliver unique, highly engineered products that provide a superior user experience.

Coupled with worldwide support in channel sales, marketing, and distribution in major verticals including healthcare, academic, state and federal government, military, large to small enterprise – and you can count on us to support your selling success!

## Leading Edge Products

Designed from the ground up to provide exceptional value through modularity and future investment protection, our products feature only high quality sustainable materials.

## Marketing Support

We leverage the latest in online marketing strategies that include social, online and offline campaigns designed to drive awareness and generate leads for business partners.

## More Sales

Years of experience in the industry has revealed deep knowledge of what customers want in new ergonomic products. This understanding has allowed us to discover and develop innovative product solutions with a focus on lasting value.

# Deliver a Better Value

## Modular Design and Expandable Frame System

Our products were engineered from the ground up to provide extreme value specifically for channel delivery. Engineers were tasked with cutting out plastic laminate, and other lower quality materials while maintaining a winning price point. You'll find professional-grade workstations crafted using sustainable materials like 100% recycled wood, rubberwood, and bamboo.

All power-standing desks move up and down, but our products also adjust laterally to accommodate a wide range of desktop sizes for future investment protection and redeployability. Simply expand the frame and interchange a 48", 60", 72", or 90" desktop surface. Heavy gauge steel wall tubing means the frame can handle the weight even at its maximum extension.

## Modular Possibilities

Over 600,000 different design combinations!

Our diverse selection of desktop surfaces help your client create a one of a kind standing desk that seamlessly integrates into any home or office environment. It's the perfect fusion of visual design, functional engineering and craftsmanship.

## A Whole New Level of Sustainable

Featuring recycled and reclaimed materials and solvent-free finishes

We cut out toxic chemicals like urea formaldehyde, solvents, and lead based paints as well as volatile organic compounds or VOCs. All desktops are finished in the United States without the use of toxic chemicals.

All natural Rubberwood and Bamboo desktops feature a solid sustainable desktop that's finished with a 100% solid, ultraviolet light cured finish. The powder-coated desktops are fully encapsulated in a coating that's four times more abrasion resistant than plastic laminate. The 100% solid, ultraviolet cured finish creates a smudge-resistant coating that brings out the natural beauty of the bamboo and rubberwood

## Grow Sales with a Unique Product

With history in the industry comes experience and relationships. Our years of dedication to a single industry have brought us close to all the leading players in the ergonomic and sit-to-stand product industry. Over time, we have earned the trust and confidence of the channel.

We choose our products carefully, keeping a close eye on thought-leaders and product innovators. Our team is well known for the ability to uncover quality product lines and place them with the right partners.

With a focus on extreme value products, we have proven the right products, the right message and the right partners are a formula for success.

## Interested in Knowing More?

Regardless of your focus as a reseller of ergonomic products, we are experts at customizing strategies that help our partners achieve new heights of success.
